Comments: Sirs, the proposed development on Holland Lake is a travesty . The forest service should not be servicing an out of state developers grandouise plans to destroy historical and pristine land belonging to the people. This is so far from the forest services mission I can't believe they are considering it. Are you aware that it borders the Bob Maeshal wilderness. I hope you take the comments of a longtime Montana resident who is passionate about preserving what we have seriously. If you destroy this area it will never be restored.

Sincerely
