Comments: To whom it may concern,

No, no, no!! Please do not destroy this area forever with a building project that profits no one but the developers!!

Two hundred trees???? Cut down???? Ow can that ge called an IMPROVEMENT? It's sickening! It betrays everything I've ever thought about the US Forest Service as an entity that preserves and protects our natural treasures.

I am a native Montanan currently living in Ohio, but I remain a staunch defender of the wild spaces in my home state. I am urging you to reconsider this potential desecration of natural beauty and deny permission for a project of this scope on what should be protected land!

Thank you.
