Comments: Big projects like are exactly why environmental analyses are required. No exclusion should be made. Conduct a full environmental analysis that takes into account wildlife, water quality, and the nearby wilderness. I would ask the permit holder to consider how the current plan would truly provide recreation opportunities to regular Montanans who have held our weddings there, who are neighbors on the lake, and who hold values that aren't considered by huge corporations. Through the pandemic we've watched our communities burst with out of state money that pushes out working-class Montanans, and the proposed project at Holland Lake caters to wealthy out of staters and disregards Montanans and their values. Don't sell use of our public lands to the highest bidder, do what is right for Montana and your neighbors.
