Comments: I am a Montana native that has been going to Holland lake for many years. This is a pristine area within the state. I am opposed to the proposed development at Holland lake. There are many areas in the state to develop that are not on a national forest and borders the wilderness. Please do not take down trees and put up new buildings near the wilderness. This ruins it for all to see and access. I am very concerned about the environmental impact to the forest and the lake. Please reconsider and stop developing the public lands!
