Comments: Please do not approve the Holland Lake Lodge Expansion project.

This part of Montana does not need any more human development. Most of this valley is already under explosive development and being sold to the highest bidder (usually out of state). What is endanger of becoming non-existent is beautifully pristine, untouched wilderness areas, which continue to become under threat of more and more human development. Holland Lake is a very special place of natural beauty, history, and wilderness. We must preserve it in its current cherished state.
