Comments: I am a fan of the old lodge and the Holland Lake and trails. I am concerned that the large expansion in the leased area of the lodge will over shadow the public usage of the trails and lake. One of the remarkable and historic values of the Swan is its isolation in this time of population density. By enlarging the footprint and housing, many more people at the lodge will crowd the lake and trails, thereby changing the experience of the visitors and pushing away the local residents who recreate on the lake and trails.

Another concern is the effect from the amount of waste water that will be sprayed out of the ponds on to the hillside.

I do see that the old lodge and facilities could use an update but would like to see a much less intense use of the lease land.
