Comments: I strongly object to the Holland Lake Lodge expansion project. Holland Lake Lodge is an historical gem in one of Montana's most pristine and beautiful places. I cannot understand how the USFS can justify approving this project just because there are already buildings on the property. If it was just an improvement project to maintain and preserve what is already there, that would be a good thing. But an expansion will forever change an area that has had little detrimental impact to the lake and the surrounding wilderness for decades. Just inviting and accommodating more visitors and more vehicles into an area that is a trailhead to a wilderness area will most definitely have an adverse impact. Please do what is right for current and future generations of Montanans who treasure this place as it exists today. Deny this permit and do not let this project go forward.
