Comments: First of all this is ridiculous, you guys need to step it up and stop getting greedy with money and expansion. Shutting down logging operations but oh boy we're gonna let big mountain bring in hell helicopters and things for construction minded Al the bears in that area . This project should be shut down immediately and you guys know that would destroy the swan valley and why would you want that . Keep the historical buildings and keep it natural. It'll destroy holland lake. The fishing will be gone and more pollution in lake and area . That's too much for that area of swan valley and the Holland lake. Please let the locals decide and not out of state people. Stop making it big deal on the news about snowmobilers logging operations they doing what Montana has been doing for long time . You guys are first to post that to news , how about being adults here and have a maturity to make post about this to the public so public knows instead of being hush hush about it .
