First name: Mike

Last name: Hollern

Organization:

Title:

Comments: At the top of this page it reads "Forest Service-Caring for the land and serving people". Can you honestly say your actions in this matter reflect this motto? To allow this development to proceed would destroy the integrity of this pristine property and serve only people of wealth. My family has utilized the campgrounds at Holland Lake every summer for the last thirty years to enjoy the area with minimal impact in our tents and campers. We swim, hike , pick huckleberries, and pull knapweed. The developers involved here are going to market this place to the rich and famous, it will destroy the integrity of the space which is obvious to anyone who has actually spent time there, which the Forest Service is choosing to ignore while also, it seems, not playing by the rules. This is a very suspicious act that lacks integrity and smells of illegality.
