Comments: I disagree with this expansion and the thought to continue to make Montana a vacation spot for the rich even more. This is a sacred lake and state to many and I believe historic buildings should be preserved and not torn down due to the want of the wealthy wanting new. Tourism is one thing for Montana but to continue to desecrate the land that has long been known for its purity and beauty would turn our state into another California. That is why I do not want this act to follow through with expansion.
