Title:

Comments: Forest service land is not for large companies to come in and exploit. It is to keep the land sacred and protected. I am born and raised in Montana. I am also in the real estate profession. There are plenty of places to expand in the state that do not includes our protected sources. This will destroy everything the forest service stands for and will continue to take over our state by opening Pandora's box. Please make the decision to protect our state & the reason the forest service is there to begin with.
