Comments: I strongly oppose this development plan. Holland Lake is a beloved, wild area that offers exposure of natural beauty, solitude, and camaraderie. Building this massive plan will upset the ecosystem of Holland Lake. The trail systems from the falls to Holland Peak, to Lena Lake, etc. will be massively impacted by this untenable uptick in human traffic. The forest will irreparably damaged by carelessness of tourists and the Swan valley will be forever changed. Recognizing this development plan could be pitched as allowing people to experience the wild, we must recognize the direct and permanent negative impact it will have on the surrounding wilderness and ecosystems. Please, please do not allow this development plan to move forward. Protect Montana for all those who love it and for all those who will fall in love with the wild when they visit.
