Comments: This is the absolutely last thing that needs to happen to better our natural resources and tarnish the beauty of The Holland Lake area. I no longer live in Montana and I wish I had more pleasant memories of my time living there but one for sure was the breathtaking beauty of that area and the memories I have of exploring it, enjoying the vast amount of hiking areas and the stunning falls where my family and I would enjoy just about every summer. I urge you not to go in on this project and to uphold the future memories families will have of that amazing land and have it untouched by just more commercializing and pollution.
