Comments: My family and I have been coming to Holland Lake for years and it is our all-time favorite place to camp. We love it because of the quieter campground and slower pace on the lake. We have canoed for years on the lake. This development would change the character of Holland Lake and increase use, increase impact on the natural surroundings, increase interruption to hikers entering the Bob Marshall Wilderness, negatively impact wildlife, and negatively impact the campground. More people, more vehicles, more noise, more parties, more litter, more development to change the natural character of Montana. What is the real motivation for the development - more revenue? Regarding the CATEX, can you honestly answer all of the form's questions "No". It will have a significant impact on the environment and the most thorough and in-depth Environmental Analysis is the only process with any honesty and integrity. This development is not being wise stewards of the incredible land you have been given to manage. I vote NO for this project.
