Comments: I believe development of the land around holland lake should be kept minimal to reduce impact to the natural environment and preserve the beauty that is a major draw for this lake. Also, am fearful of over development raising costs in that area above where locals can afford. Many Montanans have already lost access to places due to similar developments and cost increases associated with them have made the cost of living impossible for most locals. To allow for further restriction in our own state would be nearly cruel.
