Comments: Dear Representative,

I would like to raise grave concern over the unplanned and/or under-analyzed impact this project will have on water usage (exceeding current capacity and the impact of any planned additional wells), trail/environmental impact due to highly increased numbers of patrons, sanitation processing and disposal, and wildlife impact due to displacement and increased usage. This is a pristine area with a very delicate balance with nature at it's current usage/footprint. The planned expansion would not benefit the community, but rather negatively impact our remaining, truly remote/beautiful environs, for little to no benefit to those in the area.
