Comments: I appose the expansion of Holland Lake. Removing healthy trees is not needed in such beautiful forested environment. The road is not equipped to withstand the projected traffic. Traffic will also be a nuisance for the current residents and campers just before the Lodge. The quiet environment is a blessing and make Holland Lake a magical place. Expansion plans will are sure to ruin this pristine lake environment and should be kept minimal. I support updates to the current facilities, but see it as unnecessary to remove trees to build what would potentially bring more noise and traffic pollution.
