Comments: I strongly oppose development of the Holland Lake recreation site. My family and I have traveled here many times over the years from the Bitterroot Valley to camp and enjoy this remarkable area. We love the peace and serenity that this area offers. We often row our boat across the lake and hike up to the falls on the east side. A massive development of this size would greatly take away from the wild aspects of this area and negatively impact this region. Please consider denying this permit for development as this is one of the last beautiful and easily accessible areas for local Montanans wanting to step into the wilderness.
