Comments: This lake and surrounding area has been a part of my child hood, my children's and now my grand children's life. To think that it will be no longer a place we can all go and enjoy FREELY and openly is heart breaking. This Nostalgic location is one to be used and enjoyed by ALL. It should not become a place where only the wealthy can afford to go and enjoy. If all these new building come to volition, there will be less places for the camping and hiking enthusiasts, such as myself and my family. The simple roads in and out of this beautiful location will be like a freeway. I love this property as it was my own and would be devastated to see it become a "over-run, over populated area where only the rich can enjoy. Please don't let us become "corporate America"!! Please help this beautiful state that so many of us love stay free and available for OUR children/children's future!! Say "NO" to this proposal!!
