Comments: We would like to voice our concerns with the proposed expansion of the HLL complex. We have a home near the lake and 4 generations of our family have recreated on this lake. A main concern is motor boat access being restricted due to increase of docks and non motorized watercraft expanded use. #2 is the environmental impact for example the impact on the loons which have taken up residence. It seems contradictory that the cabins on the other side of the lake have no freedoms on the land yet this development has freedoms to make massive changes. Is there a double standard? What happens if this venture fails? Is it going to be broken into sections or is the forest service going to allow even greater changes. Also, is the trailhead parking lot going to be bigger or smaller than it already is? We never received any letter from the forest service in regards to this proposed project. We want to be notified of any and all upcoming activities and correspondence regarding this endeavor. We realize the lodge needs upgrades but feel the proposed expansion is too large for the size of Hooland Lake. Thank you for considering our heartfelt concerns. Jodi and Mark
