Comments: The area under consideration is adjacent to an amazing natural playground that has all that is needed for people to have a wonderful time. It is also the home to a variety of delightful creatures who are already feeling the encroachment of humanity. Building such a venue in by a pristine lake, with public access points on both sides is not a move forward. Who would this development benefit? What is its purpose? These two basic questions clearly indicate that it will only benefit a few and has no long term positive impact on the forest or the State of Montana. Please, do not support this development. It is a chose that could never be taken back.
