Comments: Out-of-staters and their money are destroying Montana. How? First of all, they work remotely, which means they don't contribute to OUR state at all, only to the state where their corporation resides. They drive up our taxes and home values and then leave, which results in a high housing market that the rest of us Montanans can't afford. Second, they shop online. They don't buy locally unless they have to. Third, they buy up our land and beautiful properties and resorts, turn them into mass people not from Montana, who don't give a crap about our land and our beautiful state. The price to stay at these places they buy and renovate are too expensive for Montanans to afford, so it draws only the rich and super rich and gives them a playground at our expense. Please, if you truly care about Montana, DO NOT let this Utah company buy this place on Holland Lake.
