Comments: Dear Forest Service,

I ask that you not approve this project. Montana is a unique state, filled with natural beauty. I have lived in many states and Montana is one of the most unique and probably why I chose land in its natural state. Holland lake is beautiful and although it would have been better if there had never been anything built by the lake, it was and we can't do anything about it. But to make a bigger project which also involves cutting down a lot of the natural trees and bringing in possibly more people, pollution and the changing of nature is not good. Has any studies been done? Why is this being hidden from the public and being rushed for approval? What if you approve the project and it is not successful? I say you not approve this project for all the citizens of Montana but at the very least you should postpone so that studies can be done and more public opinion can be heard.
