Comments: It is not the role of public land management (USDA Forest Service) to provide access, space, and opportunity for a private business to benefit and grow their business. Land management decisions should be about protecting the natural state of the lands and provide recreation opportunities that do not have a negative impact on the lands. There will always be ideas on using our public lands for someone's financial gain. Providing space for the never ending barrage of toys and development schemes should not be part of the land management decisions. Holland Lake is a place I visit yearly and I DO NOT want to see it become a playground resort and become un-affordable. I urge you to maintain it as a place we can go to for a peaceful quite space to recreate. The proposal being considered would impact my experience in a negative way as well as impact the land and wildlife that is not a good. As a major access point to the Bob Marshall Wilderness we need to keep it as natural as possible.
