Comments: This proposed expansion project at Holland Lake is a dangerous precedent to the natural state of the Swan Valley. Any day one takes to visit this lake, you will see the public enjoying the beaches, trails and beautiful water. The respect that paddlers, campers, families, boaters and hikers all show to this peaceful and serene area is truly magical. Expansion to a "resort" type of industry will diminish the public's right to these areas in which the Forest Service has been given the duty to protect. Sensible growth would be acceptable but this expansion proposal is not in any way public, forest nor environmentally sensible. Please do not allow this expanded commercialization of Holland Lake.
