Comments: Dear US Forest Service,

I am a resident of Missoula, MT and have been coming to Holland Lake Lodge for more than 15 years. My four children and I have enjoyed hiking in the area and spending days on the lake kayaking and swimming. The Lodge has always served as a great jumping off point to some of the best Montana outdoor adventures a person could want. It is an unbelievably beautiful place that holds treasured memories for our family.

I am aware that the current owner, Christian, has partnered with a company that is committed to making necessary updates to the Lodge/facilities and upgrades that will make the property safer, more environmentally sustainable and more accessible for visitors. The Lodge is not just a business for Christian--- it is a family legacy and something that is very dear to him. I am confident that he has chosen POWDR as a partner because he has thoroughly vetted their intentions & plans and feels comfortable that they will usher the Lodge into the next era while respecting the character, history and welcoming spirit.

As a Montana native, I know we are protective of our land, our traditions and our home, but I am certain that this new partnership will benefit the Lodge and the lake for many years. I look forward to continuing to enjoy it and the area for years to come and cannot wait to see what wonderful improvements will be made to ensure that we have a safe, accessible and environmentally conscious experience.

Sincerely,

Kim M.
