Comments: Holland Lake is perfect the way it is. Any super developments and revisions of the area is a complete waste of money and time. This area is sacred to so many. The damage of this project will not only ruin one of our incredible lakes and its surrounding land but the rich ecosystem of Elk, deer, bear, mountain lion, moose and every small cridder imaginable. The lake will see only a select few after construction. Leaving the locals to pay for the amenities of the rich when they had something so priceless to begin with. Keep our public land in public hands.
