Comments: I am writing to oppose this expansion and especially to oppose the use of a categorical exclusion to an EIS for this proposed expansion. This is far more than a simple repair or update, it is a large expansion that will fundamentally change the character of the area and require a lot of large machinery to accomplish. This is a completely inappropriate situation for a categorical exclusion. The addition of many more buildings, a restaurant, and other modern facilities demand there is through analysis of the impacts on water, the land, and the character of the area. Holland lake should remain a peaceful hideaway, not a modern luxury resort.
