Comments: Holland lake is a natural oasis that deserves to stay public for residence and visitors to be able to enjoy without needing to go to a resort that many won't be able to afford. I have had many camping trips, family hikes, and picnics at this majestic place and they would not have been possible with a resort on site. This is also a natural refuge for bears, deer, elk, wolves, and moose along with a wide variety of birds, bats, insects, and plants. All of these pieces are vital to protect by prohibiting further building and disruption to this land. Please consider all the lives, human and non-human, that would be affected by changing this natural area. Keep Holland lake public. Keep Holland lake safe.
