Comments: I am firmly against any increase in development of the existing lodge facility at Holland Lake. Any increase in development there will negatively impact the pristine quality of the "Holland Lake Experience ". It may not make much difference, but for what it's worth, my family heritage at Holland Lake & the nearby Swan Vally runs 6 generations back. Me being 3rd generation. My grandfather & great aunt were homesteaders nearby & stayed & worked at the original Holland Lake Ranger Station. (Near where the current public beach is. Comparison of current & old family photos reveal the back drop of the lake now as virtually unchanged since those photos were taken. The impact of any expansion of the facility will change all of this forever. Preserve/renovate the historic lodge if feasible however make no additional expansion. It's totally about the quality of the experience at Holland Lake, please don't screw it up.
