Comments: Dear Environmental Assessment Committee,

Holland Lake is among my very favorite spots in all of Montana. Indeed, it's among my favorite spots in the whole world. I say this from the perspective of having visited dozens of countries.

I moved to Montana 6 years ago to start a business with my brother. I've come to love this place in a way it's hard to describe.

To put this as directly as possible, any new development along the Holland Lake would destroy one of the most precious and singular wilderness areas I have ever encountered.

Please protect this incredible place by disallowing any significant new development.
