Comments: I fully oppose the proposed new resort development at Holland Lake! I'm appalled that our Forest Service has allowed this project to advance even THIS far! The impact of this development on Holland Lake would be unconscionable in terms of water use, sewage treatment, paving for access and parking, tree removal, boat traffic, construction scarring, use of gas powered equipment, and management of the sheer numbers of humans required to make this venture "pay". Not to mention the impact of all this activity on the wildlife population! I do not know how any of this lines up with what I THOUGHT the USFS mission was! Please reconsider your stance!
