Comments: I adamantly object to the construction proposal on Holland Lake. This is one of the most magical places in Montana where people go to be immersed in nature and enjoy the natural beauty that is found there. People need places like this... free from noises, technology, and the craziness of the modern world. Places like Holland lake are healing for the mind and the soul for everyone that visits there. This project would ruin all of that for so many people. This is forest service land...the forest service is there to protect these types of places and to keep them special. Please follow through with your duty to protect the forest and keep Holland Lake the special place that it is.
