Comments: Please do not spoil our Montana rural landscape with big city ways, can we handle that amount of traffic, pollution, rudeness, trees are precious and wildlife corridor is right there also plants that are only found in that area. Really you want a resort, there are many other places to build don't spoil a pristine area with traffic pollution people in a small byway. In winter travel is dangerous, are you going to build a super highway ? If you do you have to build it from the border of Montana all the way through, Montana is a very rural state we don't have all the immunities that other states have, nor do we want them already we are getting your trash blown in to our state from other states . Who can afford this resort, certainly not Montanans, who are you building this for, and travel is not conducive not like Vegas, LA, Chicago etc we don't need this type of development at all in our big sky state. Think twice! Use your brains!
