Title:

Comments: The transfer of these public lands would not only limit access to those unable to afford a stay at what is currently a public wilderness, but would further remove this land from the access and stewardship of its indigenous peoples. The people are not even aware that this is up for consideration- I barely found out in time myself- this is under-the-rug theft in all ways except "legal." I implore you to deny the development of this land by the proposed party, and let it remain as it is- open to all.
