Comments: Holland Lake is near and dear to my heart. It is a place where my friends and I gather every year and take in the beauty of the area. What makes Holland Lake so special is that it is owned by the Forest Service, which has always made me feel like the area will be protected.

Growth is normal. Montana's extensive growth and development is to be expected, and for the most part I am in favor of the change. However, I believe that it is important to preserve parts of Montana, particularly our public lands.

I'm not opposed to Powdr building their resort; it sounds like a lovely place! However, I am opposed to where they are being allowed to build it. Holland Lake should be preserved, so it can be enjoyed by future generations.
