Comments: An expansion of this kind is not only a disservice to the local human residents within the Swan Valley, but also to the local flora and fauna that call Holland Lake and the surrounding area home. The construction and increased traffic to the area will devastate the quiet and peaceful ambiance that so many routine visitors find as one of the main reasons we go. The increased footprint that this expansion will have is too grand and it will change the character of the lake. Wildlife is abundant here and this big lake is a major corridor for many that travel to and from the Mission Mountain range and vice versa into the Swan Mountains. This proposed expansion removes trees, increases noise pollution, and will increase human pollution into the area that will discourage wildlife from frequenting the area as they do now.

I do not support this expansion.
