Comments: I do agree that some upgrades would be beneficial, but the scope of this project is way too big and will change the lake and surrounding areas in a negative way if approved. I can see maybe rooms for 75, plus the housing for workers makes sense, but more than that is just too much. Plus putting a building right on the lake is also too much. We need to preserve Holland lake, which means making hard choices that may not improve commerce but will preserve this beautiful lake.
