Comments: The project proposed to move forward at Holland Lake would be a disgrace to preserving historical and public land for locals and visitors alike. Given the short and exclusive agenda for this project and lack of public input opportunities compared to other projects of this scale, it's tough to feel like the due diligence to involve the real true stake holders was done. The total lacking of environmental impacts assessments for the tearing down of historical buildings, new construction cramming over a 400% building space increase in the destruction area, and shift of population that'll impact this sensitive ecological system, the surrounding area of Holland Lake and the Swan Valley will suffer from out of state/big money influence yet again. Once history is gone and destroyed, we lose a bit more of the culture that has made Montana what it is. I hope these values to preserve what is here holds true.

Thank you for your consideration of my input.
