Comments: To Whom This May Concern,

As a homeowner at Copper Mountain and long time recreational enthusiast as well as advocate; I believe the project that Copper Mountain is proposing is a great step forward to continue to make Copper Mountain a wonderful place to recreate while being considerate of the environmental factors.

For me, it appears this project is vital for Copper to provide world class resources for both its local and visiting community. Selfishly, I take great pride in what Copper has to offer and projects like these will bring the resort 'up to par and beyond' the standard set by other resorts with similar offerings.

I look forward to seeing this project move forward.
