Comments: Holland Lake POWDR plans

To me, it's unfathomable for the Forest Service to even begin to consider a major real estate project on leased land who's intent is to tear down historic building and replace with multi units, as well as a large lodge & restaurant on the water front.

How about "protecting" the forest and it's historic past. Projects targeting the wealthy shouldn't have a place in Montana's Wilderness and sure should not be given the green light in destroying her valued past.
