Comments: For any project that impacts National Forests, the public must be provided adequate time for review, and assessment of environmental impact must reflect the project's scope. Neither of these conditions were met when the expansion plan of Holland Lake Lodge was made public, with mere days initially allotted for public consideration, and a missing relevant Environmental Assessment or Environmental Impact Statement.

Thankfully, the time-frame for public comments appears to have been significantly extended. Still, existing precedent (Big Mountain resort expansions of 1995 & 2019) demands preparation of an Environmental Assessment or Environmental Impact Statement for this project.
