Comments: The Holland Lake project is very intrusive to this Montana gem has been for 100 years, and now the fs wants to fast track a monster development. The proposed plan will not only endanger the lions and other wildlife that's been livings there but also contaminated the lake and lakeshore with a 156 bed occupancy in the SHORE! Then they want to tear down historical cabins and the lodge! WHY!! Is The thought of keeping the lodge historical and natural unappealing to Powdr ? Or let's be honest there in it for the money and have no problem destroying a Montana Gem. This project will impact all wildlife destroy the beauty of the trails and beaches. Let's talk about the sewage and garbage (we all know there will be enormous amounts in the forest) with the increase of people all at the same time, creating an attractive dinner for the grizzly and black bears. Then they will be a problem and the fs will have to euthanize more and more bears. How will this project help Montana??? It will only line the pockets of the Powdr company, with the astronomical prices for rooms and cabins thus keeping Montanans from coming back year after year to enjoy the lake and wildlife. A environmental study needs to be completely to protect lions and wildlife! As for as trying to build the lodge on the original site, needs to have a full study on the impact on the lake and shoreline. If this project is allowed to go thur without studies being completed, someone is getting bambozzeld and Montanas are getting the shaft!!
