Comments: As a long term Copper Mountain user and employee I fully support and recommend this proposal goes through and comes to fruition. Replacing the Timberline lift would be great as many days the lift in operation cannot keep up with the demands of the public resulting in long lines, congestion and unfavorable guest experience. A new lift would alleviate these concerns along with updating an aging infrastructure in regards to equipment.

I also am fully behind expanding the Copper Mtn bike trail system as I have seen the growth in mountain biking and the need for legitimate built mtb trails. Copper Mtn would be a great resource in filling the need for our local and visitor demand that only seems to be growing with mountain bike enthusiasts. A well built trail system would enhance the great resort Copper Mountain already is and provide more opportunities in outdoor recreation to our community as well as visitors.
