Comments: My immediate and extended family and close friends have camped at the Holland Lake Group campsite for over 20 years. We so enjoy the pristine lake and well-kept camping facilities. Over the years we have noticed increased traffic, noise and dust around our group site. While I appreciate the desire of Holland Lake Lodge to expand its facilities and capacities, I am concerned about the environmental impacts as well as the increased number of people on the one road, the trails and the lake. Maybe instead of trying to triple their capacities on this 15 acres of land, the owners could settle for just doubling their capacities and preserving the openness and remoteness of this area. If the project is approved in any capacity - the road will need paving and upkeep. Consideration of keeping this area affordable for most Montanans would be greatly appreciated.
