Comments: We must, unequivocally, support our local ecosystems by limiting our footprint. This is how I was raised, in a household that enjoyed backpacking, hiking, and kayaking. Permanent structures and lodges need to be reduced - not expanded by rich out of staters. What is happening to our public lands is devastating. We are losing a way of life that is the only of its kind in this world, because of greed and corruption. This lodge expansion will have devastating impacts, all for a quick buck.
