Comments: Full-time residents of Montana have already lost so many of our past opportunities to camp, picnic, boat and otherwise spontaneously enjoy the outdoor recreation activities that have been ours. Today, so many of those cherished opportunities have been lost to out of state visitors, thanks to the reservation system that laid on us a few years ago. I haven't spoken to any of our many friends who are camping enthusiasts who remember being advised of or asked to express their preferences either for or against this system. Frankly, given how difficult it's become to secure those much sought after spots I wonder if it's somehow being manipulated. . I am adamantly opposed to the development, restrictions or other impediments to the use, Enjoyment and first opportunities to access sites at all state owned, resident supported properties.
