Comments: I would like to request for the holland lodge NOT to be expanded. Structurally improved, but left at the capacity it is. The reason to this is simply because why do we have to make more, bigger? Can we just enjoy it for what it is? The impact on nature, locals will be huge! We have already stressed enough since the pandemic. Why don't we try to preserve it at the size it is and protect that rather than exploit it for \$\$\$. It's just \$\$\$ that's driving this project. No one talks about the impact on nature. Leave it at the original capacity but make improvements to what it needs structurally.

Thank you for hearing us out!
