Comments: I am firmly opposed to the Holland Lake Lodge Expansion Project.

I am a Montana resident, and US citizen and I oppose the proposed development (facility improvement and expansion) of Holland Lake Lodge.

The current environment around Holland Lake Lodge, that supports the local community, habitat and recreational use is appropriate for that area. The proposed expansion does not preserve the integrity of the area. The current quality of recreational and wilderness experience is high because of the limited use in the area. This proposed expansion is not in the best interest of the public. It is NOT appropriate for a categorical exclusion, it needs a full impact assessment including the impact on the local community of residents who choose to live in the area because of the limited development.

These Forest Service lands belong to the public. They are not for the financial benefit of an out of state corporation who wants to develop the land for their own gain.

Again, I am firmly opposed to the Holland Lake Lodge Expansion Project.
