Comments: Don't California our state, it is disgusting you are willing to consider a resort on one of our great Montana lakes that hasn't been ruined by boats and houses yet.

Worst of all we have to put trust in you all to protect the lakes, we see how how well you manage the forest much like California. Y'all know what the right decision is on this. Hopefully you will walk against your liberal California beliefs and think more about our great state and less about how much money you can make.

I'm sure you understand most of the people in the state don't actually have that much faith in you though, we all know money talks. At the end of the day you will have to live with your decision.

Good Day
